

WHERE DO I RECYCLE NOW?

The City has created a Drop-Off Center within the existing Residential Drop-Off Center at 811 South East Street.

WHEN CAN I DROP OFF MY RECYCLING?

Current operation hours are Tuesday and Thursday, 12pm to 5pm, and Saturday, 10am to 3pm. Staff is working with the Texas Commission on Environmental Quality (TCEQ) and will soon be able to increase those times to 6pm on Tuesday and Thursday and to 5pm on Saturday.

WHAT CAN BE RECYCLED?

The items that can be recycled have not changed; #1 and #2 Plastics (labels and caps/lids must be removed), Tin Cans, Aluminum, clean Paper and Cardboard (boxes should be broken down).

DOES IT NEED TO BE SORTED BEFORE I TAKE IT TO THE DROP-OFF SITE?

There will be separate containers for each type of recycled product. We recommend that you presort all items to help keep the wait times down when dropping off your recycling.

CURBSIDE RECYCLING SUSPENDED JUNE 15, 2020

Dear Sherman Residents:

In 2018, due to changing conditions in the global recycling markets and high levels of contamination in our recycling stream, the City modified the Curbside Recycling Program. Those of you who chose to opt into the new Program helped improve the contamination greatly. Unfortunately, since that time, the recycling market has continued to deteriorate. The recycling loads that once were unloaded for free by Waste Connections are now costing \$150/ton for that same load.

Due to these changes, [effective June 15th, the City of Sherman will be suspending the curbside pickup portion of the Recycling Program.](#) In order to continue to provide a recycling option to residents, the City is opening a Drop-Off Center to recycle. This Drop-Off Center will provide specific sorted recycle bins. Creating a presorted recycle stream allows the City to more economically recycle the goods and ensure they are recycled into new products—not dumped like trash. City staff will continue to monitor the recycling markets and, if changes occur, the Curbside Recycling Program could be restarted.

RECYCLE
